

## The Challenge

Record numbers of refugees face prolonged displacement and dangerous conditions, trapped in limbo without access to the long-term solutions they need to rebuild their lives and contribute to their communities.

## Our Mission

RefugePoint partners with refugees to access life-changing solutions and transforms how the world supports them.

## If we

Implement refugee-centered approaches across two key solution areas

**Self-Reliance (host country solutions)**  
Supporting refugees who remain in the country to which they've fled achieve self-reliance, so they can meet their own essential needs

**Resettlement and Other Pathways to Safety (third country solutions)**  
Helping refugees who can't go home and can't safely stay in the country to which they've fled relocate to a safe country where they can begin to rebuild their lives

## Core Values

Refugee-Centered | Anti-Racist & Anti-Colonial | Equity-Focused | Evidence-Informed | Trauma-Informed | Collaborative

**Through**  
strategic  
tactics  
grounded in  
partnership

## Direct Service

Providing direct assistance to refugees facing extreme vulnerabilities who are underserved by humanitarian aid systems

## Field Building

Supporting other organizations to expand programs to reach more refugees

## Systems Change

Influencing policy and decision-makers to drive large-scale change

**Then we**  
contribute to  
the following  
impacts...

Increasing  
**equitable access  
to long-term  
solutions** like  
self-reliance,  
resettlement, and  
other pathways  
that restore dignity

**Strengthening and  
transforming  
refugee response  
systems** to prioritize  
long-term solutions

## To help realize our Vision of

An inclusive world  
where all refugees can  
safely build stable,  
connected, and  
thriving lives
